Ltd. All Rights Reserved. Developed by WARRIORS TECHNOLAB Hex Lugs TerminalWe is one of the eminent manufacturer and exporter of a manufactured range of cable accessories and connectors. We trade these products in several small and large-scale industries around the world. We are also engaged in providing customized solution of these cable accessories and connectors according to the requirement of our valued customers. Canned copper tubular cable LugsOur organization is the largest manufacturer and trader of a wide range of M canned copper tubular lugs cable manufactured as ISO standards using high quality raw material. These are manufactured with high quality metal as a raw material supplied by our reliable and reliable suppliers. These canned tubular copper wire lugs are designed according to application and are available in various specifications. See more See more detailsSpecial Cable Terminal EndsWe deal with offering unique range of special Terminal Ends cables manufactured using high quality brass as raw material. These are widely used in various engineering industries. We complete the quality control and performance measure of these special end cables to ensure extreme quality and smooth operation. See more detailsCrimping Type Copper Pipe Cable Terminal EndsIt is one of the famous manufacturer, exporter and supplier of Crimping Type Copper Pipe Cable Terminal Ends designed according to the need of various small and large scale industries. The irrefutable Type copper cable terminal tips are widely required in various national and international markets. We offer these Crimping type copper wire tubular terminals to various precise specifications and with long-lasting polishing and corrosion resistance. See more See more detailsCopper Standard wall boot terminal Copper Quality Standard Wall Starter Terminal Ends that we offer are available in various specifications and sizes. We offer these standard copper wall terminal terminals according to the requirement of our valuable customers. These standard copper wall starter terminals are highly durable and have wide application in various machinery fields. These are designed in order to meet the requirement of several machine manufacturing industries. See more See more detailsCopper Reducer Pin Type Terminal Final Is the leading manufacturer and dealer of a wide range of copper reducer Pin Type Terminal Ends manufactured according to national and international standards using excellent quality raw material. These are manufactured with high quality metal as a raw material supplied by our reliable and reliable suppliers. These copper lower pin type terminals are designed according to application and are available in various specifications. See more More See more detailsCopper Compression Lugs – Long BarrelOur organization is the largest manufacturer and trader of a wide range of compression copper Lugs - Long Barrel manufactured according to national and international standards using high quality raw material. These are manufactured with high quality metal as a raw material supplied by our reliable and reliable suppliers. These copper compression lugs - long barrel are designed according to application and are available to various specifications. See more See more detailsCopper Compression Lugs - Short BarrelWe provide a distinguished range of copper compression Lugs - Short Barrel manufactured using high quality raw material with excellent tensile strength. These are available in various specifications and sizes. These copper compression lugs - short barrels are famous for high durability, ex impermeable strength, corrosion resistance and high performance. See more See more detailsAluminium - Core Sector Cable LugsIt is the largest exporter and supplier of an extensive aluminum range - Core Sector Cable Lugs manufactured from high quality raw material. These aluminum wire lugs - core field are designed for various engineering applications and are available in various specifications. We complete quality inspection of these aluminum wire lugs - core field before delivering to the end of the customer. See more See more detailsAluminium-Copper BI-Metal ConnectorSugar, supply and export a wide variety of aluminum-copper BI-Metal Connector that meets the requirements of the machine industries and is available in various sizes. We are known in many small and large industries around the world. We do full control of these BI-Metal aluminum-copper connectors at each production level to ensure high tensile strength, excellent performance and reliability. See more See more detailsAluminium-three core sector LugsWe cable construction, supply and export a wide wide aluminum-three core field cable lugs that meet the requirements of machine industries and are available in various sizes. We are known in many small and large industries around the world. We do full quality control of these aluminum-three core Lugs cable sector at each production level in order to ensure high tensile strength, excellent performance and reliability. See more See more detailsHigh Voltage Copper Terminals Double HoleOur Organization is the leading manufacturer and trader of a wide range of high-voltage copper double hole terminals manufactured as ISO standards using high quality raw material. These are manufactured with high quality metal as a raw material supplied by our reliable and reliable suppliers. These high voltage copper terminals are designed according to application and are available in various specifications. See more See more detailsMechanical Lugs CableIt is the largest manufacturer and exporter of mechanical cable lugs made from high quality raw material. These Lugs mechanical cables are designed for various engineering applications and are available in various specifications. We do full quality control of these mechanical lugs cable before delivery at the end of the customer. See more detailsCopper Compression Lug-Long BarrelOur Organization deals with manufacturing and providing a degree of accuracy of the Lug-Long Barrel copper compression used in various small and large-scale organizations. These are designed to meet the requirements of many multinational industries. We do full quality control of these Lug-Long Copper Compression Barrels according to international quality standards prior to delivery to our valuable customers. See more see more detailsCompression size Sleeves - Long BarrelWe construction, supply and export of high quality copper compression sleeves - long barrels that meet the requirements of machine industries and are available in various sizes. We are known in many small and large industries around the world. We do complete quality control of these copper compression sleeves - long barrels at each production level to ensure high tensile strength, excellent performance and reliability. See more See more detailsAttoria high voltage copper terminals The range of high voltage copper terminals we offer is available in various specifications and sizes. We offer these high voltage copper terminals according to the requirement of our valuable customers. These high voltage copper terminals are highly durable and have wide application in various machinery sectors. These are designed to meet the demand of several industries Engine. See more See more details Copper forged lugsour cable organization is the largest exporter and supplier of a wide range of canned copper wrought lugs cable manufactured using excellent quality raw material. These are manufactured high quality brass as a raw material sourced from our reliable and reliable suppliers. These canned wrought copper Lugs cable are designed according to application and are available in various specifications. See more See more detailsFour hole cable terminal ends - Economy Range We are the largest manufacturer and exporter of four holes cable Terminal Edges - Economy Range manufactured from high quality raw material. These four hole cable terminal ends are designed for various engineering applications and are available in various specifications. We do full quality control of these four-hole cable terminal ends before delivery at the end of the customer. See more detailsInjure terminals as Per Autranian StandardWe is the leading manufacturer, exporter and supplier of wide-spectrum Cable Terminal Ends As Per Autranian Standard used in various car tools and parts. These cable terminals are manufactured using extreme quality raw material and are particularly needed in various countries. We provide these cable terminal finishes in different parts of the country at reasonable prices. See more detailsNarr palm - end cable switch We provide full solution of the Phoenix Strait - Switch cable terminal ends that are available in various specifications. These cable terminals are used in various metal products manufactured by other industries. These are widely appreciated for reliability, durable nature and excellent finish. These edge cable terminals are widely required in different parts of the world because of their unique quality. See more detailsCopper insulated flat type cable terminal EndsExcellent quality copper insulated flat type cable terminal finishes that we offer are available in various specifications and sizes. We offer these copper insulated type cable terminals according to the requirement of our valuable customers. These insulated copper type terminal terminal levels are highly durable and have wide application in various machinery sectors. See more detailsCrith type heavy duty long aluminum barrel Terminal EndsWe is one of the famous exporters and supplier of type Crimping Heavy Duty Long Barrel Aluminium Terminal Edges designed according to the need of various small and large scale industries. These crimping type heavy duty long barrel aluminum terminal ends are widely required in various national and international markets. We offer these crimping type heavy duty long barrel aluminum terminal ends in various precise and with long-lasting polish resistance to corrosion. See more See more detailsAluminium forged LugsWe cable manufacturing, supplying and exporting high quality aluminum wrought Lugs cable that meets the requirements of machine industries and is available in various sizes. We are known in many small and large industries around the world. We do full quality control of these aluminum forged cable cable at each level of production to ensure high tensile strength, excellent performance and reliability. See more details Copper cable terminal ends with extended palmWe provides a manufactured range of copper terminal cable finishes with extended palm that is available in various models and manufactured using quality raw material with excellent extensive power. These copper wire terminals are known for high durability, extreme strength, corrosion resistance and high performance. See more View more detailsLong Barrel canned copper cable Terminal EndsWe is one of the famous manufacturer, exporter and supplier of Long Barrel Canned Copper Cable Terminal Ends designed according to the need of various small and large scale industries. These long barrel canned cable cable terminal ends are widely required in various national and international markets. We offer these long barrel canned copper cable terminal finishes to various exact specifications and with long lasting polishing and corrosion resistance. See more See more detailsInculated In-line LinersOur organization deals with offering a quality range of insulated in-line staples that is designed to fulfill the requirement of metal manufacturing machine manufacturing industries across the country. These insulated in-line fasteners are manufactured using the highest quality raw material and are available to different specifications. See more detailsAnable Double Barrel ConnectorsThere is a wide range of aluminum double barrel fasteners that are widely required in different countries and are available to different specifications. We manufacture these aluminum Double Barrel Connectors using excellent quality raw material that comes from our reliable suppliers. We offer these double barrel aluminum fasteners in various features after full quality and performance measure testing at various production levels. See more detailsAnally Double Barrel Connectors Two Hole MountWe is the largest exporter and supplier of aluminum double barrel fasteners two hole mount which is manufactured from high quality raw material. These aluminum double barrel connectors are designed for various engineering applications and are available in various specifications. We do full quality control of these aluminum double barrel fasteners before delivery at the customer's end. See more aluminum details through fasteners We are one of the famous aluminum exporters and suppliers through fasteners designed according to the need of several small and large scale industries. These connectors national and international markets. We offer these connectors to various exact specifications and with long lasting corrosion polish resistance. View more detailsT-Connectors!m the prominent exporter and supplier of the wide range of T-connectors used various tools and parts of cars. These are manufactured with excellent raw material quality and are highly required in various countries. We provide these T-Connectors in different parts of the country at reasonable prices. See more See more detailsFork Type copper canned cable Terminal EndsWe offer a wide range of fork type copper cable cable terminal ends that are widely required in different countries and are available to different specifications. We manufacture Fork Type Copper Canned Cable Terminal Ends using excellent quality raw material that comes from our trusted suppliers. We offer these fork type copper cable terminal finishes in various features after full quality and measure test performance at various production levels. View more detailsGlarger Taps You've been a complete solution of line taps available in standard sizes and specifications. These line faucets are used in various metal products manufactured by other industries. These are widely appreciated for reliability, durable nature and excellent finish. These line faucets are widely required in different parts of the world due to their unique quality. See more See more detailsCopper C Type CunningsOur organization is the leading manufacturer and supplier of a wide range of copper C Type Connectors that is available in various specifications and manufactured using high quality raw material. These are manufactured with high quality raw materials sourced from our reliable and reliable suppliers. These C type copper fasteners are designed according to application and are available in various specifications. See more See more detailsAlumnnion TerminalsExavigation of the range of aluminum terminals we manufacture and export is used in various small and large scale organizations and other engineering applications. These are available in various specifications and are available in various models and dimensions. We also offer these aluminum terminals in custom form according to the requirement of our valued customers. These are widely required due to excellent performance, high durability and attractive pricesView More See more detailsInculated End-Sealing FerruresOur organization is the largest exporter and supplier of a wide range of insulated end-sealing Ferrules manufactured using excellent quality raw material. These insulated fee-stamping Ferrules are manufactured with high quality raw materials sourced from our reliable and reliable suppliers. These insulated end-sealing ferrules are designed according to application and are available in various specifications. See more See more detailsHigh trend fastenersSpne of high voltage copper fasteners that we manufacture and trade are available in various specifications and sizes. We offer these high voltage copper connectors according to the requirement of our valuable customers. These high voltage copper connectors are highly durable and have wide application in a number of different Areas. These are designed in order to meet the requirement of several machine manufacturing industries. See more See more detailsHexpress Crimping ToolsOur organization is the leading manufacturer and marketer of a wide range of Hexexpress Crimping Tools manufactured as ISO standards using high quality raw material. These are manufactured with high quality metal as a raw material supplied by our reliable and reliable suppliers. These Hexexpress cutting tools are designed according to the application and are available in various specifications. See more DetailsCopper Pin Type-Bland Cable Terminal EndsIt is the prominent exporter and supplier of the wide range of C Copper Pin Type-Bland Cable Terminal Ends used in various car tools and parts. These are manufactured with excellent raw material quality and are highly required in various countries. These are widely required due to several features such as durable finish models, sleek design, easy to install and long lasting service. We provide these Copper Pin Type-Bland Cable Terminal Ends in various parts of the country at reasonable prices. See more See more detailsFour Hole Cable Terminal EndsOur organization is the leading manufacturer and dealer of a wide range of four-hole Terminal Ends cable manufactured as ISO standards using high quality raw material. These are manufactured with high quality metal as a raw material supplied by our reliable and reliable suppliers. These four hole cable terminal ends are designed according to application and are available in various specifications. See more See more detailsCopper Blade TypeWe export and supply high quality type copper blade that meets the requirements of machine industries and is available in various sizes. We are known in many small and large industries around the world. We do full quality control of these types of copper blade at each production level to ensure high tensile strength, excellent performance and reliability. See more See more detailsLugsPrecision grade tubular compression cable Lugs is used in various small and large-scale organizations and other engineering applications. These are available in various specifications and are available in various models and dimensions. We also offer these Lugs tubular compression cables in customized form according to the requirement of our valued customers. See more see more detailsLong Palm Long Barrel Cable TerminalsLong Palm Long Barrel Cable Terminals that we offer are available various sizes and used in various small and large scale and other engineering applications. These are available in various specifications and are available in various models and dimensions. We also offer these long palm long barrel cable terminals in customized form according to the requirement of our valued customers. These are widely required due to their excellent performance, high durability and Prices. See more detailsCrimping type of copper tubular cable terminal ends - Bell MoutWe provides full solution of Crimping Type copper tubular cable terminal ends - Bell Mount that is available in various specifications. These tubular copper wire terminal ends are used in various metal products manufactured by other industries. These are widely appreciated for reliability, durable nature and excellent finish. These tubular copper wire terminals are widely required in various parts of the world due to their unique quality. See more see more detailsSeed type of tin cable cable finish - Insulated Our organization is the main exporter and supplier of a wide range of ring type that tin wire was roaded finish - insulated manufactured using extreme quality raw material. These are manufactured with high quality brass as a raw material supplied by our reliable and reliable suppliers. These copper wire terminal ends are designed according to application and are available in various specifications. See more View more detailsSolation type copper weak back FerrulesWe are, provide and export high quality adhesive copper type weak back Ferrules that meets the requirements of machine industries and are available in various sizes. We are known in many small and large industries around the world. We do complete quality control of these weld type copper weak back Ferrules at each production level in order to ensure high tensile strength, excellent performance and reliability. See more detailsPow the type of copper wire tin Terminal EndsWe is one of the famous exporters and supplier of ring type canned copper cable Terminal Ends designed according to the need of various small and large scale industries. These ring type copper cable cable terminal ends are widely required in various national and international markets. We offer these ring type copper cable cable terminal finishes to various exact specifications and with long lasting polish resistance to corrosion. See more See more detailsCross-RangeonsWe provide a distinguished range of cross-rangeons manufactured using high quality raw material with excellent tensile strength. These are available in various specifications and sizes. These diagonal-connectors are known for high durability, exasthing strength, corrosion resistance and high performance. See more See more detailsCopper End Sealing FerruresOur organization is the largest exporter and supplier of a wide range copper End Sealing Ferrules manufactured using excellent raw material. These copper end sealing ferrules are manufactured with high quality brass as raw material procured from our reliable and reliable suppliers. These copper end sealing ferrules are designed according to application and are available in several specificationsView more views more detailsTinous copper reducing connections We are the prominent exporter and supplier of the largest copper tin reducing the connections used in various automobile tools and parts. These are manufactured with excellent raw material quality and are highly required in various countries. These are widely required due to several features such as durable finish models, sleek design, easy to install and long lasting service. We provide these copper cans reducing connections in different parts of the country at reasonable prices. See more View more detailsForeed type of copper cable terminal end-not insulatedIt is one of the famous exporters and supplier of ring type copper tins cable Terminal End-Non-insulated designed according to the need of various small and large scale industries. These typed type copper wire terminals are widely required in various national and international markets. We offer these ring type copper wires terminals to various exact specifications and with long lasting polish corrosion. See more detailsAlumnio Splice For LVComprehensive Aluminum Splice Series For LV we offer is used in various small and large scale organizations and other engineering applications. These are available in various specifications and are available in various models and dimensions. We also offer these Aluminum Splice for LV in customized form according to the requirement of our valued customers. These are widely required due to excellent performance, high durability and attractive prices. View more details for more details
